I'm a positive and self-motivated individual with a diverse range of experience in web and software development. I am a self-taught software developer and problem solver with 4+ years' experience, and I'm looking to work with talented people and collaborate on products that make a positive impact. My passion is to solve real world problems with software solutions, and I'm always looking to gain new software development and programming skills.

Career History

Software Developer at Indionic

June 2016 – Present (4 years)

Indionic is a software development consultancy based in East Perth. My role at Indionic involves designing, developing, and deploying custom software applications for Australian businesses, including online ordering and rental systems, primarily using tools like Ruby on Rails, JavaScript, RSpec, MySQL, PostgreSQL and WordPress.

Key Responsibilities

- Working as a developer in a two-person team on a range of custom applications, including booking systems, online ordering and ecommerce stores
- Project involvement from inception to production, including prototyping, development using Ruby on Rails, testing using RSpec, JavaScript functionality, and deploying to production servers using Git and Capistrano

Achievements

- Successfully completed a number of quality website and software applications being used by Australian businesses today
- Built an custom online ordering system using Ruby on Rails for a business in my home town (Albany, WA), which sold over 7000 fruit and vegetable boxes to their local market in the first 12 months (www.aveg.com.au)
- Having the ability to work as a self-taught programmer on production projects

Owner Manager at Art Houz Building Design

June 2013 – June 2016 (3 years)

Art Houz Building Design was an East Perth building design studio that I founded in 2013. During my time at Art Houz, my role primarily consisted of building design, working drawing documentation, liaising with local councils and consultants, and managing client projects, with the goal of delivering the best outcome for the client's needs.

Architectural Technician at Silver Thomas Hanley Architects

June 2011 – September 2013 (2 years and 3 months)

As an architectural technician, my role at Silver Thomas Hanley consisted of developing working drawings, architectural detailing, and liaising with project managers, consultants and architects on large scale healthcare projects, including Joondalup Health Campus, Wexford Medical Centre and Fiona Stanley Hospital.

Software Development Skills

Skill	Proficiency (0-5)
